

## THE INTERNSHIP PROGRAM

Nahda is proud to present a new and innovative program to add to our existing stellar suite of programs - **The Internship Program**.

As always, we are looking to develop our students' skills and experiences in many areas in new and exciting ways. Because we are dedicated to empower our students to be ready to face the world complete with depth of knowledge and an enviable set of life skills, we are introducing the Internship Program. This program is part of our Career Focus, where we offer students the opportunity to explore career paths and gain work experience in the world of work in its many guises, to students ages 10-13 years old.

We believe that giving students opportunities to explore fields of work quite early on is a beneficial way to raise awareness to the limitless opportunities there are to choose from. This program will allow exploration into some of the fields of work that will impact Saudi Arabia's growth and therefore help it to flourish in the 21st Century. It will also allow our young people to experience life as a fully-fledged member of the world of work.

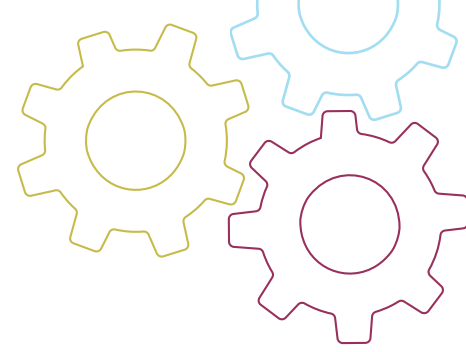

These internships will be offered by a range of well-established businesses and entrepreneurial developments in Jeddah that echo our students interests and possible career choices as much as possible.

### THE BENEFITS OF AN INTERNSHIP:

- ⚙️ Explore a career path
- ⚙️ Gain confidence
- ⚙️ Learn about how businesses and entrepreneurs work from the ground up
- ⚙️ Access a variety of tasks and departments
- ⚙️ Gain valuable work experience
- ⚙️ Create a professional network of peers
- ⚙️ Build a network with professionals already in the field
- ⚙️ Get an edge in the job market
- ⚙️ Develop and refine skills
- ⚙️ Extend knowledge of career possibilities and options available
- ⚙️ Build a strong resume (both for future jobs and for University application letters)

NAHDA ACADEMY

We are running a shortened version of this program in our Summer Camp this year. We will be visiting Jamjoom Medical Industries Co. Ltd. (JMI), a business dedicated to the manufacture of medical devices and healthcare devices. It is the largest healthcare manufacturing company in the Kingdom of Saudi Arabia. Their products are used by millions of people daily and play a vital role delivering healthcare services across the Gulf Region, South Africa, United Kingdom and United States of America. They manufacture and market safe, effective and quality products under state of the art manufacturing facilities and ensuring industry's best quality standards.

The students will tour the facility, meet with the CEO, and then take part in a work experience opportunity that will see them being part of the assembly line that organises and packs PCR face masks that will then be sent on to the company's actual buyers. The students will work for part of the day, and will receive a small compensation for their efforts, thus experiencing work as it really is - providing a service and getting compensated.

#### BELOW ARE THE PROGRAM DETAILS:

**DATE:** 8-9-10 June 2021

**TIME:** 9:30 am - 1:00 pm

Participating students will be taken to, and brought back from the factory with the school bus
